### RainMan X Internet Ready Controllers

# RainMan X

## Internet Controller

The RainMan X combines the powerful and proven technology that has made RainMan controllers the first choice of professional irrigation managers for more than twenty years, with the ease of web based remote management via our handy mobile app.

#### About the Aquamonix App

- RainCLOUD remote management portal
- Start and stop irrigation stations, pumps, and programs
- Disable programs indefinitely or on a timer
- Scale programs to save water
- Control multiple devices at the same time
- Designed for both iPhone and iPad
- Free on the App Store

#### RainMan X Features

- Powerful commercial controller
- Easy to use direct access Keypad
- Large backlit daylight readable screen
- Cellular modem (4G)

#### 24VAC Versions

- 24, 30 and 40 stations models
- Up to 6 valves per station
- 2 Master valve/pump starts
- Current Sensing feature

#### 12VDC Versions

- 12 and 24 station models
- Latching output (2 or 3-way actuator)
- Ideal for Solar Powered sites
- 2 x Master valve/pump start

#### Two Wire Version

- 30 and 50 station models
- Decoders with inbuilt lightning protection
- Decoders are re-addressable
- No need for additional grounding
- 2 Pump starts on controller

#### Enclosures

- Tough UV stable Poly Carbonate
- IP66 Rated
- Lockable

#### Sensor Options

- Current Sensing as standard (detects faulty coils)
- IC Rain Optical RainSwitch

#### RainMan X Controller at a glance.

- 12 standard irrigation programs, 14-day calendar.
- User friendly, one start time per program.
- 2 x Cycle & Soak Programs, plus Looping program.
- Water Budget adjustable from 0-999%.
- Caters for two master valves or pump starts.
- The RainMan X controller is sold web enabled ready for connection to the RainCloud.
- RainMan X controllers can be upgraded to enable integration to the RainMan Micro Central system.
- Designed, manufactured and supported in Australia.
