

# AQUAMONIX

Measure. Monitor. Master.

## DATA VIEWING PORTAL

### A complete Environmental Monitoring Solution

ENVAULT is a cloud-based data collection and management platform allowing you to access your data from wherever and whenever you like. Going beyond data collection, storage, and presentation, the ENVAULT system puts the control of your site directly at your fingertips, allowing you to make insightful decisions. Migrate to the cloud or enhance what you already have without getting locked into subscriptions, or services that you don't need.

### Product Features

- Configuration of site specific control parameters
- Control of alarms thresholds sent via Email or SMS
- Google map interface
- Custom mimics
- Scalable data sets, interactive trends and charts
- Cost effective subscription options
- 3 year parts and labour warranty

### Soil Moisture

Name	Value	State	Alarm	Last Updated
Moisture at 100 mm	55.19	Normal	Normal	2016-07-24 17:00:00
Moisture at 300 mm	55.56	Normal	Normal	2016-07-24 17:00:00
Moisture at 600 mm	22.82	Normal	Normal	2016-07-24 17:00:00
Moisture at 1200 mm	51.07	Normal	Normal	2016-07-24 17:00:00
Moisture at 2000 mm	44.30	Normal	Normal	2016-07-24 17:00:00
Total Soil Moisture	228.93	Normal	Normal	2016-07-24 17:00:00
EC at 300 mm	3804.69	Normal	Normal	2016-07-24 17:00:00
EC at 1200 mm	2989.24 VIC	Normal	Normal	2016-07-24 17:00:00
EC at 2000 mm	2047.65	Normal	Normal	2016-07-24 17:00:00
Battery	12.92 V	Normal	Normal	2016-07-24 17:00:00
RSSI	0.00	Low Low	Normal	2016-07-24 17:00:00

## WHAT ELSE CAN ENVAULT DO?

- Your data experience can be customised with a range of adaptable modular tools - such as maps, charts, reports, alarms, remote device control and more
- ENVAULT supports images, video, and i/o data streams
- Apply a range of modifications, equations, and formulate values based on the multiple streams of data using proprietary real-time historian data sampler
- Manipulate data with our intuitive module toolbars, for customising your visual experience
- Manage your devices in groups by location, buildings, or installation
- Apply real-time alarms, and alarm-based-operations to your assets' groups and types of devices to cut down on management overhead

Aquamonix Solutions is constantly developing new capabilities by leveraging a rich history of innovation and customer focused R&D.
