

AQUAMONIX
Measure. Monitor. Master.

RAINMAN AUTOMATIC CONTROL VALVES

Aquamonix works with the worlds best valve and actuator manufacturers to develop a complimentary range of products to integrate to your control system.

RainMAN Automatic Control Valves are the perfect addition for your control system designed to be used in a wide range of applications in irrigation, water treatment, and HVAC systems.

Features

- Powder coated alloy housing
- High torque motor
- Manual override
- Position indicator
- Limit switches
- Captive lock
- DN50 to DN400
- Isolation or regulation
- Wireless option with RainWAN node

TECHNICAL DATA

Valve type	PVC Wafer	Voltage	110,220,38VAC, 50/60Hz
Actuator type	Isolation	Input (Isolation)	12, 24 VDC
	Regulation	Input (Regulation)	Digital, 4-20mA
Available diameters	DN50 to DN400	Indicator	0-5VDC, 0-10VDC, 4-20mA
Max pressure	1.0mPa	Manual	Visual Dial
Environmental	IP65 Rated	Seal	Keyed gear mechanism
	-30°C to +60°C		EDPM Rubber
