DEVINCI 2-WIRE ENCODER

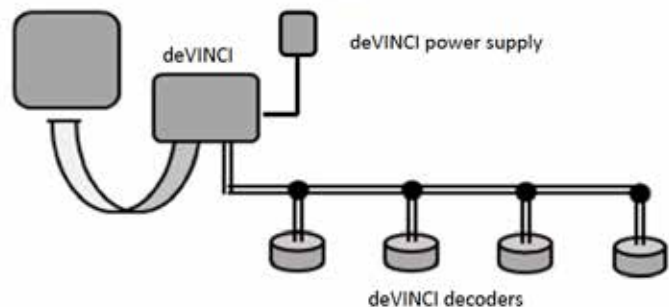

Introducing the innovative deVINCI 2-Wire Encoder. 2-wire technology allows for easy conversion of existing systems to allow the full benefits of a Tonick decoder system.

Tonick Watering is a global innovator of smart irrigation 2-wire and wireless control technology.

FEATURES

- Converts any 24VAC multiwire irrigation controller to 2-Wire decoder system
- Converts any device with 12-24VDC outputs to 2-Wire decoder system
- Allows station extension to multi-wire controllers without trenching back
- Needs single grounding point only
- Works with any brand of controller
- Suits deVINCI landscape decoders or DIAS Solenoid decoders
- True AC 2-wire system
- Maximum of 24 stations
- Easy to install, fits in minutes
- Can use existing field wiring
- Compact form factor
- Cost effective

DEVINCI DECODER OPTIONS

DEVINCI LANDSCAPE DECODER

DV.DEC.1
Single Decoder
Works with
valve solenoid

- 2 decoders run simultaneously
- Potted for direct bury
- Inbuilt lightning protection
- Re-addressable
- Cost effective
- Suits most irrigation valves

DIAS K DECODER IN A SOLENOID

DIAS-K or
DIAS-3W Single
Decoder
replaces valve
solenoid

- 6 decoders run simultaneously
- Potted for waterproofing
- Inbuilt lightning protection
- Re-addressable
- LED status indicator
- Thread adaptors to suit common irrigation valves
