

PROJECT DESCRIPTION

Truck Mounted Flow Metering

Windsor, New South Wales

Premier Pumpouts engaged Aquamonix to supply a range of pattern approved flowmeters to assist pumping truck operators with the measurement and reporting of liquid waste collections. Aquamonix provided flowmeters connected to a customised solution to ensure that mandatory EPA reporting requirements are met. The software records flow measurement and allows drivers to print receipts for residential and commercial properties.

PROJECT FEATURES

- Truck mounted flow meters
- Measurement of pumping collections
- Tablet reporting and receipting system
- Driver training and certification

"The Aquamonix team have done a fantastic job with their custom flowmeter and software solution! Furthermore, they assisted our drivers with training and technical support ensuring reliable service and transition to the new system. We look forward to working with Aquamonix again in the near future!"
